plain white 7028

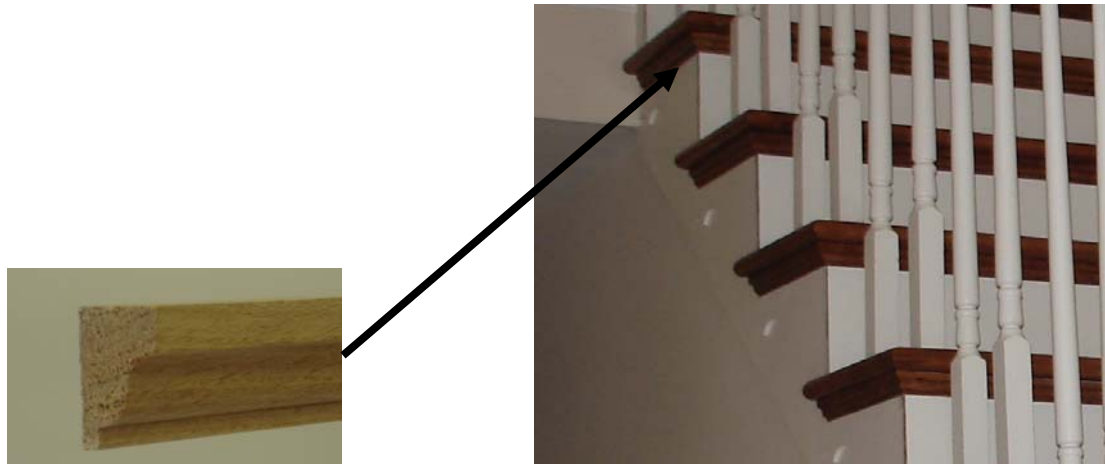

There can be left hand brackets and right hand brackets.

Cove (Scotia) is used under treads and along skirt boards (also know as stringer) 5/8" x 3/4"

Cove is not necessary with EZTREAD. The EZTREAD will lip over the riser therefore the cove is not needed.

EZCOVE was design to cover the open end of a mitered tread or under the nose of the tread if desired.

STAIR PARTS 101

Double Mitered Return is a tread that is open on both sides.

Left side mitered return is open on the left when standing at the bottom of the stair looking up.

Right side mitered return is open on the right when standing at the bottom of the stair looking up.

STAIR PARTS 101
